Tara O'Reilly

Tara is a 19-year-old student driving a 2012 Toyota Yaris with 140,000 km on it. As this was a second-hand car with 2 previous owners Tara wants to ensure the car is mechanically okay and has no issues with it. As she is a student, she doesn't have a lot of money to spend so it is important that tara keeps her car safe, cleaned and regularly serviced to avoid any faults appearing on her dashboard. With the use of the application, Tara will be able to understand what each fault means and how best to fix them without asking for help.

Tara's Goals

- Tara's main goal is to learn more about cars and the faults mean that appear on her dashboard with the app.
- She also wants to learn how to fix a simple fault by herself to save money.
- She also wants to have access to roadside assistance numbers in need of emergency.
- She also wants to be notified of nearby mechanic shops encase of a serious fault.

Interface Requirements

- To be able to navigate through the app with ease, especially in a high stressed environment.
- To be able to access roadside assistance where necessary as she travels an hour to college each day and back home.
- To receive relevant information about the warning symbols mean that may appear on her dashboard.
